IBM i Integrations Made Simple

Deliver responsive customer experiences, open new revenue channels, and improve operational efficiency with our IBM i integration products and services. Lightweight, quick to implement, and easy to use, our products unlock IBM i data and business logic via APIs, Event Streams, and Process Automation with little to no custom development.

BEST PLACES TO WORK INDIA

FSQS REGISTERED

Information Security Management ISO 27001 Certified

CERTIFIED ISO 9001:2015 COMPANY

infoCDC

User-friendly change data capture solution for IBM i systems that automatically monitors and streams data changes from user specified DB2 tables to target systems, requiring no manual development.

infoConnect

Directly call IBM i programs from cloud/on-prem middleware platforms such as MuleSoft and Confluent (Kafka) and exchange messages via native IBM i data queues.

Hub

Standalone component that transforms IBM i programs into reusable REST APIs and can be deployed on-prem, directly on the IBM i, as well as leading middleware platforms, enabling any middleware to integrate with the IBM i while additionally providing event-streaming capabilities.

webTF

A lightweight IBM i component that simplifies the implementation of outbound (IBM i -> external API) integrations for companies leveraging middleware platforms such as MuleSoft or Confluent (Kafka).

infoRPA

IBM i green screen automation plugin that simulates and turns manual user actions into APIs without the need for backend development or application source code. Requires no additional infrastructure to run on the IBM i.

Lightweight and easy to use IBM i integration tools

Enabling hassle free IBM i to external system integrations backed by a cross-platform team of IBM i, Java, MuleSoft, Kafka, Azure and AWS professionals

We are a global team of cross-platform integration professionals driving transformational initiatives and delivering successful business outcomes since 1994

POC assistance and implementation services for IBM i, Mulesoft, Kafka, and other integration platforms

IBM i modernization, application development, test automation, and data migration

Cloud integration and infrastructure solutions for Azure, AWS, and other major cloud providers

DevOps, CI / CD and Test Automation services for IBM i and cross-platform teams

Flexible delivery and support options
